Milestone – 12: Triggers

Field Update Using Trigger

Whenever a internal Marks is inserted if the marks is greater than or equal to 200 it must update the status field to Pass or else it must update to fail

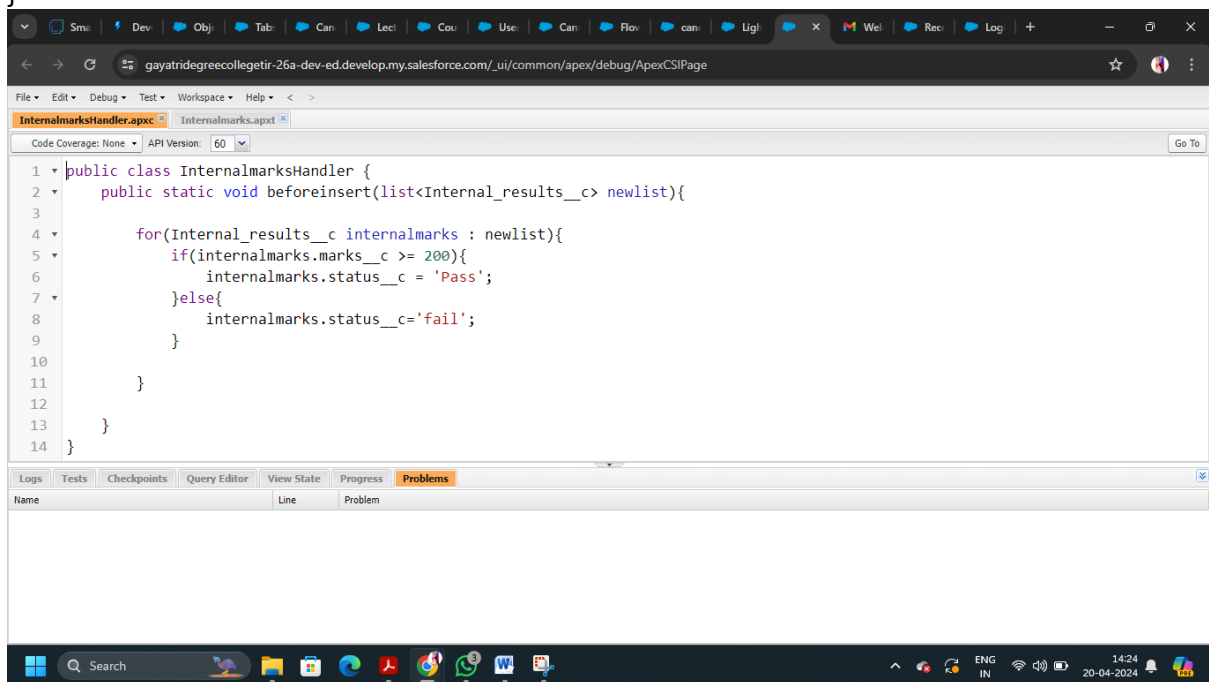

1. Go to the gear icon and select the developer console.
2. From the menu bar click on file and select Apex class.
3. Now give the class name as InternalmarksHandler
4. Now Write the below code

```
public class InternalmarksHandler {  
    public static void beforeinsert(list<Internal_result__c> newList){
```

```

    for(Internal_result__c internalmarks : newlist){
        if(internalmarks.marks__c >= 200){
            internalmarks.status__c = 'Pass';
        }else{
            internalmarks.status__c='fail';
        }
    }
}
}
}

```

5. From the menu bar click on file and select Apex trigger.

6. Now give the trigger name as Internalmarks

7. Now write the below code

```

trigger Internalmarks on Internal_result__c(before insert,after update) {
    If(trigger.isInsert)
    {
        If(trigger.isBefore)
        {
            InternalmarksHandler.beforeinsert(Trigger.new);
        }
    }
}

```

8.Trigger Working as follows:

In the following record Marks field is given as 300,Now trigger triggers and status changes to Pass

CREATING GITHUB ACCOUNT

Steps

1. Go to <https://github.com/join> in a web browser. You can use any web browser on your computer, phone, or tablet to join. Before you can create branches or make any pull requests, you'll need an account.

- Some ad blockers, including uBlock Origin, prevent GitHub's verification CAPTCHA puzzle from appearing. For best results, disable your web browser's ad blocker when signing up for GitHub.

2. Enter your personal details. In addition to creating a username and entering an email address, you'll also have to create a password. Your password must be at least 15 characters in length *or* at least 8 characters with at least one number and lowercase letter.

Join GitHub

First, let's create your user account

Username *

wikihowneveconcepts ✓

Email address *

Password *

..... ✓

Make sure it's at least 15 characters OR at least 8 characters including a number and a lowercase letter.

Email preferences

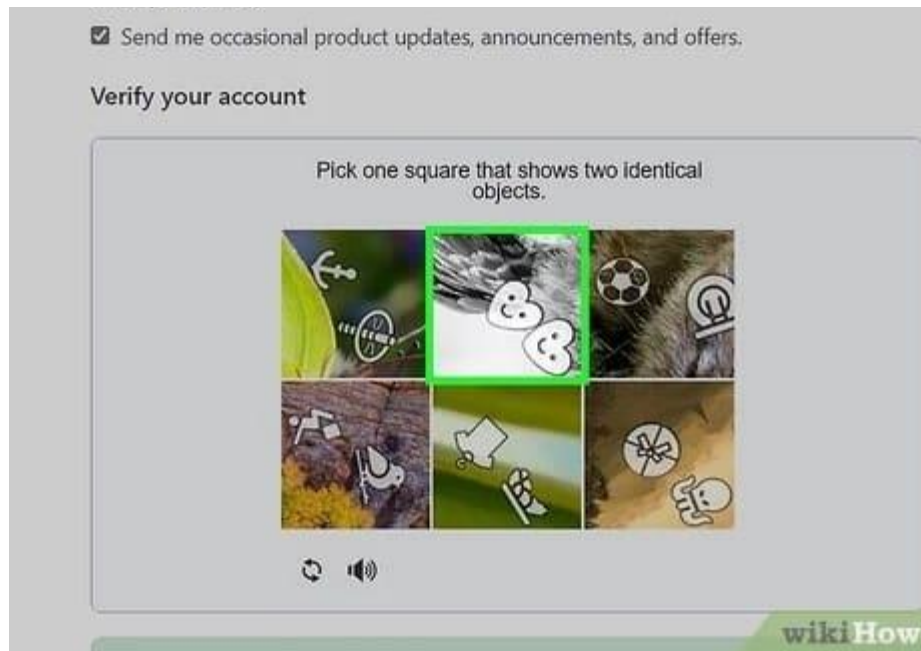

☒ Send me occasional product updates, announcements, and offers.

Verify your account

wikiHow

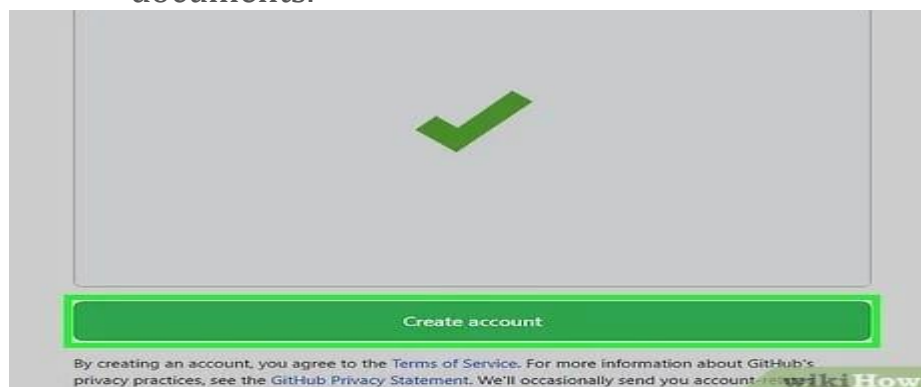

3. Click Verify to start the verification puzzle. The instructions vary by puzzle, so just follow the on-screen instructions to confirm that you are a human. A green checkmark will appear after completing the puzzle.

- You can switch to an audio challenge by pressing the speaker button under the **Verify** button.
- If you see an error that says "Unable to verify your captcha response," it's because your web browser's ad blocking extension prevented the CAPTCHA puzzle from appearing. **Disable all ad-blocking extensions**, refresh the page, and then click **VERIFY** to start the CAPTCHA.

4. Click the green **Create account** button. It's below the form, at the bottom of the page. This will take you to an email verification page.

- Carefully review the Terms of Service at <https://help.github.com/en/articles/github-terms-of-service> and the Privacy Statement at <https://help.github.com/en/articles/github-privacy-statement> before you continue. Continuing past the next step confirms that you agree to both documents.

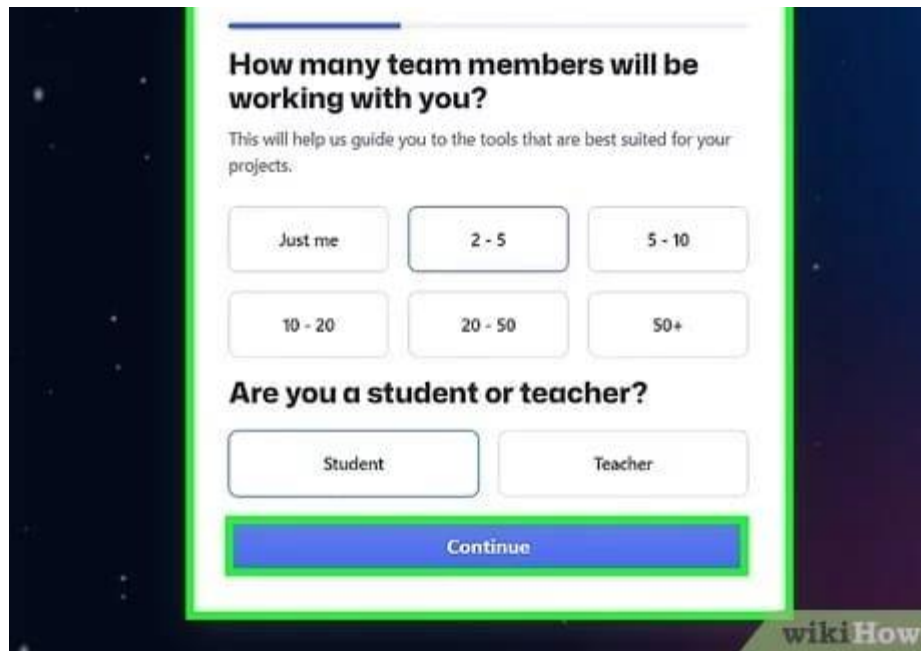

5. **Verify your email by entering the code.** After clicking **Create account**, you'll receive an email with a code. Enter this code on the

verification page. Entering the code will automatically take you to the welcome page.

6. Select your preferences and click Continue. GitHub displays a quick survey that can help you tailor your experience to match what you're looking for. You'll be sent to the plan selection page after completing the survey.

- You can skip this survey by clicking **Skip personalization** at the bottom of the page. Clicking this will take you directly to your GitHub dashboard page with a free account. You can sign up for GitHub Pro at any time.

A screenshot of a GitHub onboarding form. The form is white with a green border and is set against a dark blue background. It contains two main sections: 'How many team members will be working with you?' and 'Are you a student or teacher?'. The first section has six buttons for team size ranges: 'Just me', '2 - 5', '5 - 10', '10 - 20', '20 - 50', and '50+'. The second section has two buttons: 'Student' and 'Teacher'. A blue 'Continue' button is at the bottom. A 'wikiHow' watermark is visible in the bottom right corner.

How many team members will be working with you?

This will help us guide you to the tools that are best suited for your projects.

Just me 2 - 5 5 - 10

10 - 20 20 - 50 50+

Are you a student or teacher?

Student Teacher

7.Note the types of plans offered by GitHub. There are a few different plans to choose from, varying in the amount of features provided.[2]

- **Free:** Unlimited public and private repositories, up to 3 collaborators, issues and bug tracking, and project management tools.
- **Pro:** Unlimited access to all repositories, unlimited collaborators, GitHub email support, and advanced insight tools.
- **Team:** All of the aforementioned features, plus team access controls and user management.
- **Enterprise:** All of the features of the Team plan, plus self-hosting or cloud hosting, priority support, single sign-on support, and more.

8. Select the free plan. On the plan selection page, scroll down to click the button for choosing a free plan. This will immediately take you to your GitHub dashboard. You're ready to **download some directories and repositories, or download a file.**

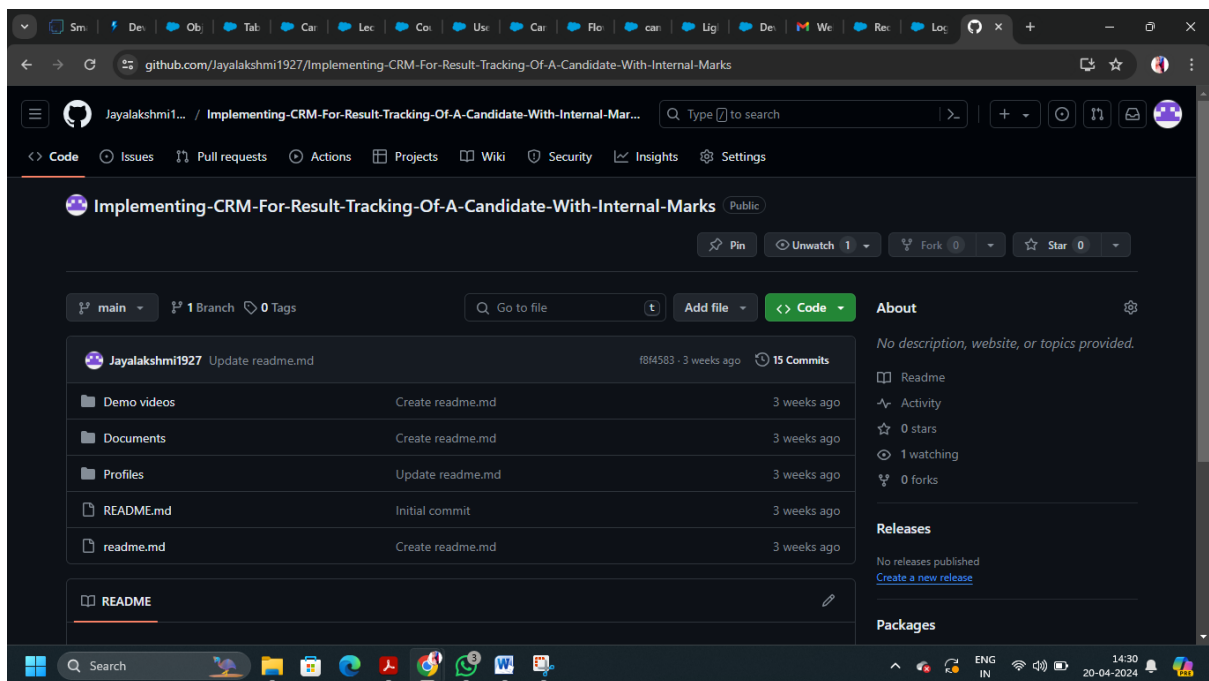

CREATING A REPOSITORY

How to Create a Repositories in GitHub

Stage - 01

1. Select Your Avatar --> Your Repositories --> Repositories
2. Click "+" Button --> New Repository
3. Enter Repository Name (Project Name)
4. Check Add a Readme File
5. Now Click Create repository

Stage - 02 (Create a Folders)

1. Click Add File --> Create new file
2. Enter in Name of the File (Folder_Name/readme.md) --> Click Commit Changes

1.Creating Documents folder:

Click add file → create new file

Documents/readme.md → click commit changes

2. Creating Demo Videos Folder:

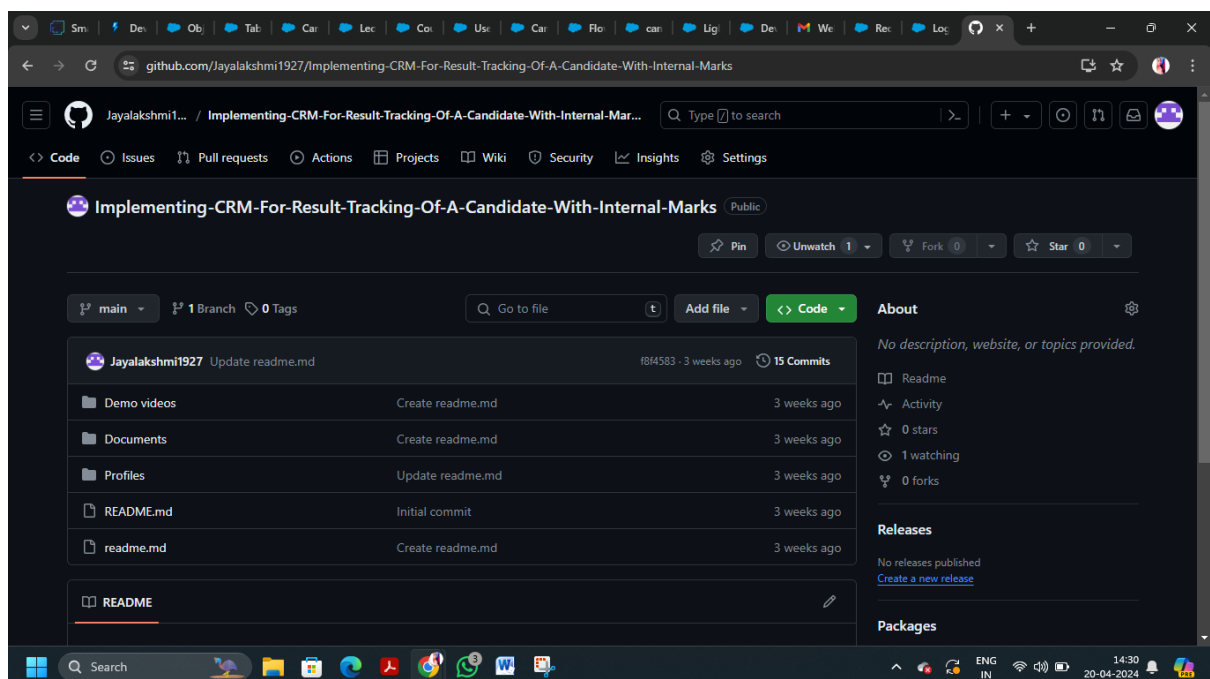

Click add file → create new file

Demo videos/readme.md → click commit changes

3. creating Profiles folder:

Click add file → create new file

Profiles/readme.md → click commit changes

THE END
